

A close-up photograph of two hands shaking in a firm grip, symbolizing agreement or partnership. The hands are set against a bright, out-of-focus background, possibly a window with a view of a city skyline. The image is partially framed by a dark blue circular shape on the left and bottom edges.

YOUR RISK, OUR EXPERTISE

**Risk Evolves: Bespoke risk and
compliance solutions, tailored to you**

Risk Evolves is a leading and multi-award-winning firm specialising in risk, compliance governance and training.

Our expert team supports organisations from all sectors to manage, protect and secure their data and assets.

We also provide all businesses, regardless of size, access to tailored compliance, risk management and business continuity advice.

We are honoured to be a trusted partner of our clients and partners.

BE PREPARED AND DON'T PUT A SECURE FUTURE AT RISK

Risk is inherent in every aspect of business, from daily operations to long-term strategic planning.

Ignoring threats and hoping they won't cause an issue is not an option.

Effective management of risk can be the difference between success or failure.

Our comprehensive business services cater for all sectors and businesses.

These services include:

- Data Protection and GDPR
- Cyber Security
- ISO Certification
- Health and Safety
- Risk Management
- Environmental, Social and Governance (ESG)
- Training and Education
- Acquisition and Mergers
- Supply Chain Management.

DATA PROTECTION AND GDPR

Data is a powerful and valuable asset, but it can also be extremely vulnerable.

In the past 12 months, half of UK businesses (50%) and around a third of charities (32%) have reported having experienced some form of security breach or attack*.

With an increasing number of data breaches, we work with businesses to understand how an organisation collects, stores, accesses and shares data. We scrutinise every

aspect of an organisation, creating tailored policies and procedures to reduce the risk of non-compliance, fines and reputational damage.

Our compliance service also provides the expert support you need at a fraction of the price of employing a full-time in-house General Data Protection Regulation (GDPR) expert.

Assess your risks and discover how our no-nonsense advice can minimise your risks. [Visit our website.](#)

CYBER SECURITY

Take your cyber security processes to the next level

In this digital age, cyber attacks are one of the biggest threats businesses face.

While cyber security is rooted in technology, protecting your data from criminals requires more than an IT solution. It means that everyone takes personal responsibility for keeping your organisation safe.

Approximately 312,000 businesses and 27,000 registered charities have been the victim of at least one cyber crime in the past 12 months, according to a recent UK Government cyber crime survey*.

Our experienced consultants can help you achieve and maintain Cyber Essentials, IASME Governance and ISO27001 certifications, to protect your business and reassure stakeholders that you take your cyber security seriously.

Find out more about our comprehensive range of [cyber security services](#).

ISO CERTIFICATION

All businesses, regardless of size and sector, need to deliver high-quality products and services consistently.

Being ISO certified means your processes have been externally audited by the International Organization for Standardization (ISO), demonstrating your business adheres to internationally recognised 'gold' standards.

With more than 21,000 ISO standards available, our ISO specialists will guide you through the process, breaking down the complex certification process and providing jargon-free support. We also manage the relationship with the certification body on your behalf.

Find out how we can create compliant processes and procedures to meet the needs of your organisation and stakeholders by [visiting our website](#).

HEALTH & SAFETY

We all want to get home safe from work.

Every business must have a policy for managing health and safety.

Proactive health and safety management has multiple benefits, including compliance with legislation and reducing the risk of financial penalties and reputational damage.

This means doing the right thing and putting your staff's physical and wellbeing safety at the heart of your business.

Our team will be an extra pair of hands (and ears) to keep your business and team safe and secure. Find out more about how [safeguarding your people](#) protects your business on our website.

RISK MANAGEMENT

Risks don't come with a warning sign, but our specialists will help your team recognise and prevent dangers and navigate around hazards.

Our experienced team includes expert knowledge from across a wide range of industries. As independent advisers, our clients and partners rely on us to provide impartial and informed advice, without any technical jargon.

As always, we would not ask our customers to do anything we would not do ourselves.

Which is why we are fellows of the International Institute of Risk Management (IIRSM) and Safety Managers, are ISO9001, ISO27001, ISO27701 and Cyber Essentials certified. We have the expertise to support your risk management journey.

Take time to prepare for the unexpected.

Discover more about the importance of risk management and [how Risk Evolves can help your business](#), on our website.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE

Sustainability requires an integrated approach to your environmental and economic policies and procedures.

While we all have a responsibility to do our part, Environmental, Social and Governance (ESG) factors do influence investor and consumer behaviour. Developing a sustainable ESG framework provides businesses with opportunities to positively impact profits. In fact, the Nielsen Global Corporate Sustainability Report* showed that 66% of consumers said they would pay more for a product if it came from a sustainable brand.

At Risk Evolves, our credentials mean a lot. A key criteria for selecting partners is their commitment to 'do no harm'. We believe all businesses have a responsibility to act in a sustainable and socially responsible manner, which is why we're certified by EcoVadis and are a BCorp.

We help organisations plan, implement, evaluate and integrate feasible and workable solutions into sustainable practices.

Take the next step on your sustainability journey with [Risk Evolves](#).

TRAINING AND EDUCATION

Continual training and development is essential for all sectors and organisations, from entry-level interns and apprentices, to the directors of the board.

Organisations with proactive learning cultures thrive.

Our specialists deliver cutting-edge training across all industries and sectors to protect staff and businesses.

Our Managing Health and Safety Risks – The Essentials – developed in conjunction with

the International Institute of Risk and Safety Management (IIRSM) – supports individuals in their role to manage health and safety responsibilities.

Plus our jargon-free cyber security training is ideal to support your team to confidently spot dangers.

In addition to individualised training sessions, we also run webinar sessions, offering information on a range of risk, compliance and corporate governance topics. Discover more [on our website](#).

ACQUISITION AND MERGERS

When considering selling your business or acquiring one, we are here to help.

From planning to execution, our expert team provides practical tools and solutions during the transition of your business.

We will guide you through the benefits of a robust compliance culture and the key considerations that you need to be aware of.

With business continuity we understand that navigating unforeseen challenges is an inevitable part of maintaining an organisation, which is why a robust business continuity plan should be in place.

Our team can help you develop a living framework, which is regularly refined and adjusted to account for internal and external pressures.

To embrace change, contact us for advice on mergers and acquisitions via [our website](#).

SUPPLY CHAIN MANAGEMENT

Businesses rely on a number of moving and uncontrollable factors.

Each business has a supply chain – a network of businesses which help get your products or services to clients and customers. This can include product development, delivery, IT and data, marketing, and much more.

But a corporate supply chain is only as strong as its weakest link.

According to recent research by the UK Government, just over one in 10 businesses say they review the risks posted by

their immediate suppliers (11%) and just under one in 10 are looking at their wider supply chain (6%)*.

It is important to have effective strategies in place which can be adapted to operational requirements.

We assess supplier risk and help businesses implement effective security measures.

Our team will audit your supply chain and provide you with resilience planning. Be prepared, not unaware. Find out more on our [Supply Chain Management](#) section on our website.

WHAT TO DO?

There are simple steps organisations can take and our team of business risk and security specialists can guide you through the digital and compliance minefield.

We also have a large catalogue of free-to-watch, 30-minute webinars focused on all risk, compliance, corporate governance and training business needs, with more [on our website](#).
